- Crisis / Site Management Plan
- Health, Safety & Environmental Management System
- Business Continuity Plan
- Process Safety Management

Health, Safety & Environmental Management System

Health, Safety & Environmental Management System (HSEMS) involves effective implementation of a comprehensive system of management controls. Effective HSEMS deals with hazards encountered during day-to-day operations to minimise impacts to personnel, property and environment. It is also a key component in any MHI Safety Case / CIMAH Report.

We aim to facilitate the use of best practice to clients in all aspects of safety management. We will help you set your policy, organise your staff, plan and set standards, measure your performance and improve by annual audit and review. Our HSEMS covers :

- Safety Policy
- Safety Philosophy
- Roles & Responsibility
- Emergency Response Plans & Procedures
- Safety Performance Standards & Indicators
- Hazard Register
- Permit-to-Work System
- Job Safety Analysis
- Incident Reporting & Investigation
- Accident Investigation
- Safety Procedures & Instruction

Our comprehensive HSEMS services can be applied to audit, design, assessment and certification (OSHAS 18001) stages :
